

Disaster Recovery as a Service (DRaaS) with Carbonite

WHAT IS RECOVERY POINT DRaaS WITH CARBONITE?

Recovery Point x86 HA DRaaS for Physical Servers is a Disaster Recovery as a Service (DRaaS) offering that uses Carbonite Availability to provide data protection and disaster recovery for your physical workloads. Continuous replication and very fast failover allow you to maintain the highest availability of your physical Windows and Linux servers, preventing downtime and data loss.

This simple, yet powerful DRaaS recovery tool for physical servers combines Continuous Data Protection (CDP), orchestration and automation in one, simple solution. The service is available as a Fully Managed or Assisted solution, and includes 24x7 access to highly credentialed Recovery Point support staff.

Hybrid configurations combining your own hosted storage and/or compute with Recovery Point's INcloud infrastructure are supported. All services are delivered from Uptime Institute Tier III certified facilities.

In addition, Recovery Point offers a full suite of DRaaS solutions for other platforms, including virtual x86, AIX, IBMi and Z Mainframe, so you only need one provider for all of your resilience needs.

PERFORMANCE THAT MEETS YOUR NEEDS

Replication

Cloud Storage

High Availability

WHAT DO YOU GET?

KEY RESILIENCE FEATURES:

Physical Systems Support

Physical systems, which are typically critical to operations, are often left out of the disaster preparedness plan. Carbonite Availability solution can replicate physical Microsoft Windows or Linux servers on any underlying platform and to any target: physical, virtual or cloud. This enables you to unify your business continuity solution across all platforms in a single solution.

Data Loss Avoidance

Carbonite Availability continuously replicates changes from the source environment into a secondary target, anywhere in the world. Changes are transmitted in real time, ensuring the replica is in sync. The software replicates files, applications or an entire server, including its system settings.

Rapid Failovers Prevent Downtime

In the event of a disaster to one system or an entire data center, a failover to the secondary location can be easily invoked. The secondary systems spin up and your users are rerouted with only a few seconds or minutes of interruption.

Minimal Performance Impact

The production servers protected by Carbonite Availability will not experience performance degradation due to the replication. As changes are captured and transmitted at the byte level, impact to network performance is minimal.

Convenient Testing and Verified Recoverability

Test as frequently as your requirements demand to ensure continuous business resilience through orchestrated recovery exercising. Be confident that your files, applications and servers can be reliably restored when needed.

Total Solution Visibility

Whether you chose a Fully Managed or Assisted service, you always have complete visibility into your production and recovery environments. Proactive monitoring and alerting will help discover and resolve issues in your IT environment before they impact your operations.

KEY SERVICE FEATURES

Cost savings compared to conventional recovery services

- Our solutions eliminate CAPEX and obsolescence costs and minimize ongoing expenses by offering many services on-demand.
- High rates of data dedupe and compression reduce storage and network expenses
- Integrated replication and backup services enable you to tier your recovery priorities to lower the cost of managing your risk.

Proof that the solution meets your needs before you commit to it

- Our no cost, proof-of-concept testing program establishes confidence in both the solution and our award-winning services. You can “try before you buy.”

Flexible managed services options that let you select the level of support you need

- Choose between an Assisted or Fully Managed services. Both offer 24x7 direct access to Recovery Point’s highly credentialed support staff.

Optional Managed Application Recovery services

- Leave the hard stuff to us. We’ll orchestrate your recoveries and hand you back your applications, ready for login.

WHY CHOOSE DRaaS POWERED BY RECOVERY POINT?

- Over 20 years of recovery execution experience supporting complex IT environments
- Industry leadership recognized by the leading analysts

- Reliable, resilient solutions delivered from Uptime Institute Certified Tier III facilities
- Support for large heterogeneous environments and legacy systems

- Low cost, national “Last Mile” network with equal access to over 700 carriers

INDUSTRY RECOGNITION

Recovery Point named in the July 2018 Gartner Magic Quadrant for DRaaS, scoring the highest in Ability to Execute for the second consecutive year.

“Recovery Point is one of three vendors in this Magic Quadrant that has significant experience providing recovery for non-x86 workloads and mainframes. Of the three, Recovery Point proposals have been the most competitive by a significant margin when Gartner has performed side-by-side comparison contract reviews on behalf of Gartner clients.”
